

THE JUBILEE.

Boston in a State of Excitement. The Preparation for the Peace Jubilee. From Our Own Correspondent.

The Hub is in a state of feverish excitement. And why should she not be? The greatest musical festival since the American war, the whole world witnesses is about to take place in her very midst. It is needless to say to an hour to follow up the gigantic scheme from its very infancy. Enough to be said, the festival promises to be eminently successful, far surpassing the keenest expectations of the most sanguine.

Boston to-day is filled with strangers, filled as she never has been before. Every nook and corner, hall, every nook and corner is occupied by shelter-seeking people, and all come here for the sole purpose, that of helping her to celebrate the restoration of peace throughout the country.

The Coliseum. Amidst all the bustle it is quite natural that the centre of attraction should be the building in which this great celebration is to take place, the building better known as the Coliseum. The general answer to the question, "Where is the Coliseum situated?" is, "On St. James Park, Back Bay." This answer is generally ample to satisfy a resident or a suburban, but the stranger needs more explicit information, and for his benefit we may add that St. James Park was a few months ago nothing more or less than a sandy plain of several acres, constituting a part of the territory reclaimed from the sea and the operation known as "Back Bay Improvement." The Park was laid out only on the maps, having nothing but imaginary boundaries, and being in fact a "Park" only in a prospective sense. The spot, however, is easily described in the remark that it lies at the foot of western extremity of the settled portions of Boylston street and St. James avenue, which thoroughfares form the best immediate approaches to it. The Coliseum covers most of the surface of the "Park," and extends over considerable more ground, too, in the direction of the Providence Railroad track, to within two hundred feet of which its southerly wall approaches. The building is about fifteen hundred feet, judging by the eye, due southwest of the Institute of Technology and the Academy of Natural History, and a quarter of a mile, more or less, from the southwest corner of the Public Garden.

The Coliseum is really a magnificent building. By persons of Messrs. Danham & Niles, the gentlemen to whom the arrangements for the press have been entrusted, and to whose kind attentions your correspondent is much indebted) we were enabled to get an inside view of the building this morning. The decorations are decidedly imposing, being rich and, at the same time, appropriate. Of course, bunting in the national colors prevails. Flags and coats of arms of every nation float from the pillars that support the ceiling. The space occupies about two-fifths of the structure, the stage allotted to the orchestra being in the centre.

The organ, erected especially for the festival occasion, occupies the very rear, the organist facing the conductor. Close to the conductor's stand are a number of speaking tubes connecting with the different portions of the chorus, and it is through these conductors will issue their orders.

The chorus will be composed of ten thousand singers, while the orchestra will be composed of over one thousand performers.

In addition to the orchestra, various bands of music have been engaged, which may be named as follows:—Metropolitan Band, Boston; Boston Cornet, Boston; Ninth Regiment Band, Boston; Edmund's Band, Boston; Suffolk Band, Boston; Hall's Band, Boston; Harvard Brass Band, American Brass Band, Providence; Manchester (N. H.) Cornet Band; Doring's Band, Troy, N. Y.; Westmouth (Mass.) Brass Band; Bridgewater (Mass.) Brass Band; Worcester Cornet Band; Nashua (N. H.) Cornet Band; Taunton National Military Band. The members of the orchestra will wear citizen's dress, and the bands will be clad in their respective uniforms.

Philadelphia is represented by seventy of her best musicians. Amongst them we notice Chas. S. Smith, Charles Jarvis, M. H. Cross, Carl Gaertner, L. E. Geike, Carl Seltz, William Stoll, Jr., C. Plagemann, and others too numerous to mention.

This orchestra will be constituted as follows, and will comprise the *creme de la creme* of all the instrumentalists:—

Table listing musical instruments and their counts: First Violins, 115; Flutes, 10; Second Violins, 10; Clarinettes, 8; Violoncelles, 8; Bassoons, 8; Double Basses, 6; Horns, 12; Trombones, 10; Trumpets, 10; Drums, 2; Grand Total, 484.

The Grand Orchestra. This will be the grand combination of all the instrumental performers, and will include the following instruments and numbers thereof mentioned in addition to those constituting the select orchestra: Piccolos and Flutes, 25; Bass Trombones, 25; Small Drums, 25; Cornets, 25; Trombones, 25; Alto Horns, 25; Tenor Horns, 25; Tenor Trombones, 25; Bass Trombones, 25; Grand Total, 1074. The Bull will play on the first desk, on dit, with Carl Rosa.

There will be two soloists, Madame Parepa-Rosa and Miss Adelaide, who will sing on each day. The small solos occurring in some of the oratorios and choruses will be sung by twelve soprano, twelve alto, twelve tenor, and twelve basso selected from our most distinguished home talent.

The first general rehearsal will take place at 9 A. M. to-morrow (Tuesday), it having been found impossible to have the completion of the building finished before that time. At 10 A. M. the members of the press will be officially received. It is expected that one thousand representatives of the press will be present.

A Grand Ball. Although the week will be tolerably full without it, it has been considered that the Jubilee festivities would be largely incomplete if not made more lengthened by a grand ball. And in deference to the expressed desire of a large number of influential citizens who are desirous to provide an opportunity for the social enjoyment of the people, and to give city guests and visitors, it has been decided to give a grand promenade concert and ball at the Coliseum, on the evening of the anniversary of the Battle of Bunker Hill, Thursday, June 17, and the exercises will be a fitting and joyous termination of the festivities which will precede them during the day. Music will be furnished by the select orchestra that ever performed for the inspiration of a salubrious assembly. Five hundred musicians, including the best of the grand convocation of instrumentalists, will manufacture bewitching strains under the direction of Mr. Gilmore for the dance, and DeWorth's military band, largely augmented, and under the direction of Mr. DeWorth, will furnish the accompaniment to perform brilliant selections during the intermissions of dancing, so that music will be increasing during the night. The supper will be simple and good, and gentlemen will be supplied with the additional expense of three dollars. Supper will be provided in various rooms of the Coliseum.

The sale of tickets has already been quite large, and it is easy and reasonable to prophesy the assembling of one of the greatest and most joyous gatherings of the American continent.

The Neighboring Villages. Great planets always have smaller satellites revolving around them; great men are surrounded by the "Federal friends" of their country, and it is perhaps proper and natural that the Coliseum should become the centre of a small village. The "Almighty Dollar" here comes in to exhort the people, and those who have no regular business save that of spreading sail when the wind blows have in large numbers conceived in their day-dreams an army of hungry and thirsty people that the June sun and the July heat should patiently justify about under the fond belief

that they are having a good time in coming to the Jubilee, and have by a legitimate process sought to coax the pennies from the pockets of the sufferers. Long ago the owners of the contiguous land were beset by small speculators who procured leases of the territory during the continuance of the festival, and have erected a hundred or more ugly looking sheds, which they have let out to vendors of soda, spruce beer, cigars, doughnuts, ice cream, peanuts, gingerbread, and other stomach-distressing compounds. These maniacs are arranged with all the beautiful regularity of an aboriginal settlement, and are of many sizes and shapes as hallstones in a field, and are covered with flaming advertisements of all sorts of patent medicines, nostrums, hair-beautifiers, teeth-preservers, and ten thousand other things, for which space is granted by the proprietor for no such purpose.

Desiring to know whether it would be profitable to set up a peanut refectory, we inquired of the landlord of three "chophans," one of which he occupied, what he would let for tenement for 2000 feet, one 15 feet front by 30 deep, which he said had the advantage of "fronting on two streets," he said we could use that for the large hall, and for another, another half as large, for 800. We conclude not to invest in peanuts; also that "confidence" must be an element in the make-up of those who propose to get rich by selling Lazarus around.

The Morris Brothers have erected a small Coliseum, capable of accommodating 1200 people, about the corner of the large hall, and they propose to regale with negro minstrelsy such as disapprobation or impetuosity exclude from the "big sing."

Other Performances. During Jubilee week there will be concerts every evening (except Thursday) in Union Hall, at which some of the best talent in the city will appear. You are invited with so many amusements around us, one cannot help having a jolly time, and in fact everybody seems bound to have it, and so will yours, C. SHARP.

CITY INTELLIGENCE.

GUNPOWDER.

A New Mechanical Motor—An Important Invention—The Gunpowder Hammer and Pile-Driver. The application of gunpowder as a mechanical motor has been proposed by engineers for many years, and the problem appears to have been solved, at least so far as the use of this material as a substitute for steam and other sources of power in forcing and pile-driving.

Some weeks ago we published a description of some interesting experiments at the Franklin Institute with a gunpowder forge-hammer, invented by Mr. Thomas Shaw, which proved, as conclusively as was possible with a small model, the practicability and great value of the invention. The experiments were conducted by Mr. John W. Lynn, Reed street wharf, where a number of engineers and others interested in mechanical science assembled to witness the performances of a pile-driving machine constructed on the same principle as the gunpowder forge-hammer.

The experiments were conducted under the supervision of a committee composed of Chief Engineer W. W. Wood, United States Navy; T. J. Lovelock, Esq., Inspector of Boilers; and M. H. Hoff, Esq., Chief Engineer of the Philadelphia Navy Yard, who have kept an accurate record of all the data necessary to demonstrate the actual performances of the machine. It was the unanimous opinion not only of the committee, but of all who were present, that the invention was one of great importance, and that it must ultimately lead to further improvements in the art of pile-driving, which is now effected on the whole system at present in vogue for the forging of metals. The gunpowder hammer pushes as well as pulls, and the force of its performance suggests an important consideration in the manipulation of metals that engineers will be quick to appreciate.

An important element in this gunpowder machine is its cheapness and the economy with which it can be operated. Krupp, the celebrated Prussian gun founder, has made the most elegant cabinet furniture, manufactured by George J. Henckels expressly for his warehouse sales, comprising rosewood and walnut parlor and library sets, and also a large quantity of fine furniture, wood and walnut sideboards, centre and bouquet tables, etageres, fancy chairs, etc. This sale will commence on Friday next, June 18, at 10 o'clock, Messrs. Thomas & Sons will sell, at their auction rooms, Nos. 139 and 141 S. Fourth street, all the above-mentioned furniture, for sale.

MEETING OF COMMON COUNCIL.—A number of the members of Common Council assembled in the chamber this afternoon, in pursuance of a call to take action upon the death of David McClain, Esq., a member from the Fourth ward. No quorum being present, Mr. Sellers was called to the chair, when, on motion, the meeting adjourned to meet to-morrow afternoon at 7 o'clock, for the purpose of participating in the funeral of the deceased. An invitation was extended to Select Council to participate in the ceremonies.

CENTRAL STATISTICAL HEARINGS.—Thomas Shane (colored) was brought before the court on a charge of a case of mathematical instruments from the office of Mr. Brown, on Locust street, above Fifth, and a hearing this afternoon, but owing to the insubstantiality of the testimony, Mr. Shane was discharged. Alexander Smith (colored) was held for trial on the charge of stealing sugar from the store of Janney & Andrews, No. 123 Market street.

CRUELTY TO ANIMALS.—Wm. Fetter was arrested yesterday at 10 o'clock, on a charge of cruelty to animals, for having cruelly beaten an over-laden horse. Squid Hayward held him to answer at the next term of court at North-west.

CORONER'S INQUEST.—The coroner's jury in the case of Common Councilman McClain, who was killed on the North Pennsylvania Railroad on Saturday, rendered a verdict of accidental death.

SLIGHT FIRE.—The alarm at a few minutes before 11 o'clock this morning was sounded by a slight fire in a bulk window of a stove-making machine store on Eighth street, above Willow.

FOREIGN AFFAIRS. Emigration to the United States—Alabama Claims—Again—Prince Arthur's Travels.

FROM WASHINGTON. Distribution of Government Vessels. WASHINGTON, June 15.—Rear Admiral Craven, under date of June 2, reports the distribution of the vessels under his command as follows:—The Pensacola was in the Gulf; the California was expected to return to San Francisco June 13; the Osprey and Resaca were at Mare Island Navy Yard repairing; the Jamestown sailed April 7 from Mazatlan for Panama; the Cyane was daily expected at San Francisco; the Mohican was to go into commission on the 7th inst.; the Saginaw is at Mare Island.

The Coming Solar Eclipse. Professor Smith Newcomb, William Harkness, and John R. Eastman, are ordered to proceed to Des Moines, Iowa, or within one hundred miles of that city, for making observations of the eclipse of the sun on the 7th of August next.

Internal Revenue Affairs. WASHINGTON, June 15.—A number of changes are being made by Commissioner Delano in Storekeepers in the States of Kentucky and Tennessee. The number of appointments for subordinate offices of the Revenue department averages about forty per day. J. Bernard Apple has been reappointed deputy collector of Internal Revenue for the First district of Pennsylvania.

FROM THE WEST. The McCoolle-Allen Fight.—The Departure from St. Louis. ST. LOUIS, June 15.—At 9 o'clock this A. M. two boats left here with McCoolle and Allen. Eight hundred persons were in the Louisville, and five hundred in the "St. Louis." Gallatin has challenged the winner. Betting is one hundred to seventy on McCoolle.

Conflicting Rumors About the Fight. CINCINNATI, June 15.—There are conflicting rumors circulating here about the Allen-McCoolle fight, but nothing definite is anticipated before 2 P. M. The street rumor is that Gallatin has challenged the winner. Betting is one hundred to seventy on McCoolle.

FROM NEW YORK. The Gold and Stock Markets. NEW YORK, June 15.—The gold market active at 7 per cent. Good commercial paper and foreign exchange dull and flat. Gold opened at 135 1/2, but the London quotations for 5-20s steadily sent it down to 135 1/2, and since then it has only rallied to 135 1/2. Holders are long of gold, and unless any political circumstances intervene, the premium must fall within the week. The bears have not done with the stock market. An onslaught was made by them today, and the market fell. The principal quotations are: PACIFIC MAIL at 58 1/2; Northwestern, 52 1/2; do. preferred, 52 1/2; St. Paul, 73 1/2; do. preferred, 84 1/2; New York Central, 108 1/2; Fort Wayne, 106 1/2; Erie, 40 1/2; Michigan Southern, 103 1/2; Erie active at 29 1/2.

Free Labor Bureau. NEW YORK, June 15.—The free labor bureau and intelligence office was opened here to-day by the Department of Public Charities. To be open daily. No fees charged.

CUBA. Expected Recognition from More South American Republics. An effort is now making to induce the Governments of Ecuador and Bolivia to take the same step that have already been taken by Chile, Mexico, and Peru, and it is believed that success will crown the efforts of the Cuban Government.

Position and Prospects of the Revolutionists. The condition and prospects of the Cuban revolution are regarded by its agents and supporters as most favorable. Prominent Cubans who have recently arrived consider the independence of the island as already assured, and very nearly attained. Recent events, they consider, indicate that Spanish authority in Cuba may soon terminate.

THE PEACE JUBILEE. The Rehearsals To-day.—The Avill Chorus—Despatch to the Associated Press. BOSTON, June 15.—The rehearsals have been going on since 10 o'clock this morning, and everything indicates that the musical part of even the first day's display will work with perfect smoothness. The Avill Chorus, after 44 days of rehearsal, is now closing rehearsal with fine effect. Not less than 15,000 people are listening to the rehearsal. The arrangements throughout are admirable. A complimentary column has given to the members of the press this morning, at which there was an immense number of representatives.

FROM NOVA SCOTIA. The Legislature Procrastinated. HALIFAX, June 15.—The Legislature was prorogued this afternoon by Governor Doyle. In his speech he said:—"I sincerely hope the policy you have adopted will lead to the removal of the evils that have retarded the prosperity of the province, and that the people of the colony will long continue to manifest their loyalty to the Queen and attachment to British institutions."

Latest Markets by Telegraph. NEW YORK, June 15.—Cotton advancing; 5000 bales sold at 52 1/2; Flour steady; sales of 7500 barrels. Wheat active and advanced; sales of 32,000 bushels No. 1 at 1 1/4; No. 2 at 1 1/4; No. 3 at 1 1/4; No. 4 at 1 1/4; No. 5 at 1 1/4; No. 6 at 1 1/4; No. 7 at 1 1/4; No. 8 at 1 1/4; No. 9 at 1 1/4; No. 10 at 1 1/4;
